AN UNRIVALLED PEDIGREE OF QUALITY AND SUCCESS

OUR HERITAGE

Mumford & Wood was established in 1954 to produce joinery using traditional craftsmanship with an emphasis on quality and attention to detail. Throughout the Company's distinguished history, it has supplied windows and doors to many prestigious projects and, as such, has an unrivalled pedigree. Today Mumford & Wood operate from bespoke state-of-the-art premises in Tiptree, Essex, and continue to forge strong partnerships with existing and new customers alike.

OUR PHILOSOPHY

Superb design – both technical and aesthetic, excellent quality, precision built, and all with the aim of giving excellent life span and economical service. This is backed-up with outstanding levels of customer service at every stage of the process.

OUR GREATEST ASSET

Our position in the sector can only be maintained if we have a highly skilled and motivated workforce. We therefore strongly believe in the value of our employees and promote a spirit of cooperation, teamwork and continuous improvement. We have a high regard for health & safety issues and ensure we provide pleasant and safe working conditions for all our employees.

ENVIRONMENTAL POLICY

Our products are of course predominantly manufactured from timber, all of which comes from sustainable forest sources. The use of engineered wood components reduces the volume of raw materials overall, and waste from our manufacturing process is kept to a minimum and recycled wherever possible. For example, wood shavings are collected and distributed for animal bedding, whilst timber off-cuts are used as heating fuel.

THE FINEST TIMBER WINDOWS & DOORS

CONSERVATION PRODUCTS

We offer an extensive range of period sash window styles to meet varied specifications, together with French doorsets and casement windows to complete the range. The styling detail of our products is based on historically researched moulded sections which are particularly suitable for renovation and new projects requiring a traditional appearance. The subtle shallow lines of these mouldings create the delicate slender effect of traditional profiles, and are virtually indistinguishable from originals.

CONTEMPORARY RANGE

Our contemporary products will appeal to the project architect, developer or client who is looking for a more functional appearance with crisp modular lines. These quality timber products are designed with simple contemporary profiles for projects seeking an alternative style to the traditional appearance. Available with open in tilt turn windows, folding doors, sliding doors and open out casement windows and doors.

THE BEST QUALITY

Mumford & Wood's windows and doors are manufactured using high quality timber sourced from Europe and North America. The main types being European Larch and Douglas Fir, both of which give excellent natural durability with a 60 year desired life expectancy. For superior strength and stability, knot free (clear graded) laminate timber is used in most components.

ENERGY RATINGS AND SECURED BY DESIGN

Mumford & Wood products can be supplied with BSI energy ratings to ensure your project or home exceeds current building regulation requirements and meets future standards and those the Code for Sustainable Homes. The same products have passed BS7950 for enhanced security and meet the stringent demands of the police's flagship Secured by Design scheme.

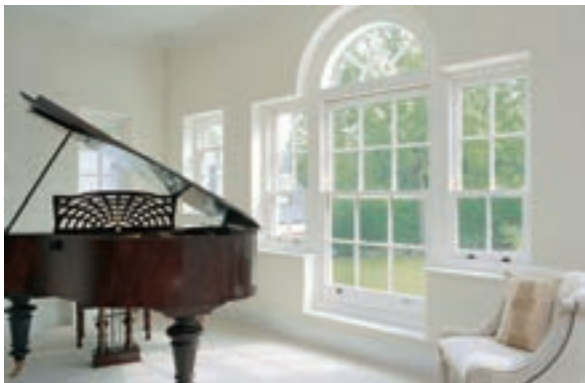

FLEXIBILITY ON SIZES

Because of the nature of our products, we've ensured that our manufacturing process is fully geared up to handle made-to-measure sizes to suit our customers' specific requirements.

MANUFACTURING QUALITY, QUICK LEAD TIMES & EXPERTISE

Mumford & Wood have invested in UK production to ensure quick and reliable lead times with superb quality and design expertise. 

HOW TO ENQUIRE

QUOTATION ENQUIRIES

- In the first instance please visit www.mumfordwood.com to try our online enquiry process.
- Alternatively please forward architectural drawings, sketches and window schedules to our office giving details of your specification requirements. For replacement windows to existing openings an easy to follow self measure sheet is available on request for initial quotation purposes. A site survey/measure service is available on receipt of an order.

ORDERING

All items are made to order to suit each customer's individual requirements. On receipt of an order a member of our sales team will be appointed to you, ensuring your specification and delivery dates are met.

CAD INFORMATION

Product drawing information in AutoCAD can be downloaded from our website.
